

Mixed Review for Section A

According to legend, an ancient Greek mathematician was stepping into his bath when he made the following discovery: A body immersed in water has the same mass as the amount of water it displaces. He was so excited that he is said to have run down the street, crying, "Eureka!"

To find out who the mathematician was, find the answer to each exercise at the bottom of the page and write the letter on the blank above the answer. Some answers are not used.
